

Fixed Fountains A Simple Solution to Architectural Fountains

Not all fountains need to float! Otterbine's complete line of 1/2HP-5HP surface spray systems are available as a stationary fountain without requiring any special piping or vaults that are typically associated with architectural fountains.

Perfect for man-made basins these stands are manufactured from 316 st/st with adjustable legs that can be placed in varying depths from 14in to 30in (36cm to 76cm). Each of the three legs can be positioned at different heights to accommodate sloped bottoms; while the rubber feet can be removed for earth bottoms.

Create attractive displays at night with the addition of our 3 or 6 light Fountain Glo™ lighting systems.

PRODUCT ILLUSTRATION

- 1** Adjustable 316 st/st legs allows for operation in varying depths; fine adjustment leg allows for installation in sloped basins.
- 2** Removable rubber pads allow for installation in man-made basins or earthen floors.
- 3** Units are placed securely within stand for easy installation.
- 4** Lighting brackets are integrated into the legs of the stand and allow for 3 or 6 lights to be added.

Complete package is safety tested, approved and listed with ETL, 60Hz panels conform to UL508a. Products for the European Union are also safety tested, approved, and carry CE certification. See www.otterbine.com for product testing and package details.

FIXED FOUNTAINS

60 Hz	MIN DEPTH	MAX DEPTH
1/2HP Systems	14in (36cm)	20in (51cm)
1HP-5HP Systems	22in (56cm)	30in (76cm)

Contact Otterbine if additional depth is required. Low level and high level shut-off options are available.
